

Algebraic Concepts
Lesson 17 Worksheet
Math for Standards

Name _____

Date _____

For each question, you need to find the answer and show your work. Each problem is worth 3 points: one for the correct answer and two for showing your work. For some problems, you may just need to write out how you know you have the correct answer.

Use the table below to answer questions 1 and 2.

x	y
1	3
-2	4
0	2
2	5

1. What is the domain of the set? 2. What is the range of the set?

Use the table below to answer questions 3 and 4.

x	y
-5	8
-4	5
0	-2
8	-6

3. What is the domain of the set? 4. What is the range of the set?

5. List a set of four ordered pairs (any ordered pairs) so that the set represents a function.

Use the table below for questions 6 and 7.

x	y
0	-6
-5	4
3	5
1	9

6. What is the domain of the set?

7. What is the range of the set?

8. Sketch two graphs in the space below so that the first graph represents a function and the second graph does not. How do you know your answers are correct?

Open-Ended Question: Answer this question on a separate sheet of paper. Make sure as you answer the open-ended question that you show your work AND explain how you know you are doing the correct work. YOU MUST EXPLAIN WHAT YOU ARE DOING!!!

Use the data in the table to create a graph (use graph paper) and answer the questions.

<i>Age (years)</i>	<i>Height (inches)</i>
4	37
5	40
6	42
7	44
8	46
9	49

A. Is the relation a function? How do you know?

B. Would it make sense to connect the points with a line? Explain your answer.
